Corporate Overview:

Tennant Limited traces its roots back to Charles Tennant and Company, a Scottish chemical manufacturing firm founded in 1788. Charles Tennant discovered a method of manufacturing calcium hypochlorite (known today as pool chlorine), which revolutionised the bleaching industry in the United Kingdom.

The Tennant group of companies grew as a manufacturer and distributor of chemical and mineral products to become a truly global company at the turn of the 20th Century. Part of the business, including the Australian operation, was sold during the 1950's to the Consolidated Goldfields Group. As part of this group, Tennant Limited was incorporated in Sydney in 1966. The group was later renamed RGC Limited. The Wolfe family took over ownership of Tennant Limited Australia in 1992, and are still actively involved in the organisation.

Tennant Limited has been intimately involved in the supply of raw materials to the mining, agricultural, industrial mineral and metallurgical industry for 40 years. Through many years of experience, the company has developed expertise in the areas of logistics management, procurement, and contract management. During the past ten years the company has developed its production and manufacturing capabilities within Australia.

Today, Tennant Limited is an established international supplier and raw material producer, specialising in the production, trading, distribution and financing of a broad range of chemicals, commodities, and minerals to the mining, industrial and agricultural industries. In addition to the company's traditional agency and representation business, the company currently supports a large range of Tennant-branded chemicals and raw materials that are either toll manufactured or sourced through Tennant's China-based subsidiary, Tennant Logistics.

Tennant Limited implements and maintains an effective and efficient quality management system, certified to the requirements of ISO 9001:2000. The firm's Quality System ensures that clients' expectations are consistently met, and opportunities to improve our business are identified through the continuous review of business processes and policies.

As a professional organisation, Tennant is committed to the pursuit of excellence. Our vision is to deliver outstanding client service to our customers, to provide fulfilling, satisfying professional careers to our people, to act as a responsible corporate citizen, and to be successful in meeting the ongoing needs of all of our stakeholders. Our goal is to deliver our clients with common sense, practical solutions in a commercial, ethical and professional manner.

Tennant Capability Statement:

Tennant Limited is an Australian company focused on the delivery of raw materials to a range of markets, delivering safe, reliable, cost effective raw material solutions to industry. Our team of experienced professionals and our time-honed processes allow us to effectively deal with the multitude of logistic, communication, transport and supply challenges that are faced in the supply of raw materials across a geographically diverse market area.

The three cornerstones of Tennant's business are Safety, Reliability and Cost Effective solutions. Tennant delivers on these outcomes for its clients, contractors, stakeholders and the community at large as demonstrated below:

Responsible Care:

As a responsible supplier to the Australian Market, Tennant Limited is a member of the Plastic and Chemical Industries Association (PACIA) in Australia. PACIA manages the International Council of Chemical Associations Responsible Care program. An extract of the Responsible Care program objectives is shown below:

"Responsible Care is the chemical industry's global voluntary initiative under which companies, through their national associations, work together to continuously improve their health, safety and environmental performance, and communicate with stakeholders about their products and processes in the manufacture and supply of safe and affordable goods that bring real benefits to society."

Tennant is a signatory to PACIA's Responsible Care program and as such follows its code of practice for employee health & safety, environmental protection, storage and transport safety, product stewardship, manufacturing process safety and community awareness.

Quality Policy:

Tennant Limited has implemented and maintains an effective and efficient quality management system, in accordance and compliance with ISO 9001:2000. All employees clearly understand the expectations and appropriate actions necessary to ensure the continuity of supply and service.

Occupational Health, Safety and Environment Policy:

Tennant Limited is committed to providing a safe and healthy working environment. As an organization, Tennant Limited places the highest priority on accident prevention, injury protection and promotion of the health, safety and welfare of all employees, contractors and the communities in which we operate.

Tennant Limited is committed to protecting the environment by the appropriate control and management of any discharges into landfill, watercourses and the atmosphere. Tennant Limited's OHS&E policy puts in place defined, formal, repeatable processes to identify, assess, and reduce or eliminate workplace risks to health & safety or the environment, and is available on request.

Supply Chain Management:

Tennant Limited's supply activities are aimed at ensuring our client's requirements are consistently satisfied within the supply chain. Product delivery systems are an integral part of our service, and our business concentrates on the fact that every client is different and has varying need and priorities. Based on long term supply relationships, Tennant Limited's approach to business is to provide our clients security and reliability of supply and quality.

Production and Manufacturing Operations:

In addition to the supply of products, Tennant Limited has considerable experience in production and manufacturing operations and distribution of products and services globally. Tennant are able to combine local skills and knowledge with sophisticated processes and management to overcome the challenges of working in a rapidly changing environment. As a producer and manufacturer, Tennant Limited has an insight to the challenges that our clients face.

- Great Australia Operation (GAO) Mine, Cloncurry, Queensland.

The Great Australia Operation is the mining and production site for Tennant Limited's primary source of Copper Sulphate. The supply of Copper Sulphate is complimented by long-term relationships and partnerships with external product sources within the region, supporting the changing demands of Tennant Limited's clients, and ensuring consistency of supply.

- Liquichem, Kalgoorlie, Western Australia.

Liquichem is Tennant Limited's tolling and processing plant, located in the Kalgoorlie Gold Fields of Western Australia. Liquichem supplies liquid and solid chemicals, such as Copper Sulphate, Xanthates, Sodium Hydrosulphide, SMBS and Caustic soda to the local mining industry.

- Tennant Logistics, Guangzhou, China.

Tennant Logistics offers innovative sourcing and supply chain solutions through its Chinese business unit, Tennant Logistics. Tennant has a long-term commitment and intimate knowledge of the Chinese market, having operated in the People's Republic of China for over 10 years. Tennant Logistics currently operates Tennant Limited's sourcing facility in Guangzhou and manages a number of long-term relationships throughout China.

Tennant Logistics ensures all goods are tested, labeled, packaged, stored and shipped in accordance with international standards and in accordance with appropriate levels of corporate responsibility. Product stewardship and corporate responsibility is central to Tennant's supply chain philosophy.
